990 Response to a Load Tender

Functional Group=GF

Purpose: The purpose of this document is to provide information pertaining to the Standard EDI Integration that is offered by One Network Enterprises (ONE).

This Draft Standard contains the format and establishes the data contents of the Response to a Load Tender Transaction Set (990) for use within the context of an Electronic Data Interchange (EDI) environment. The transaction set can be used to provide general information relative to a specific shipment. The Response to a Load Tender (**Other than TRUCK Load**) is used as the response to a Motor Carrier Shipment Information Transaction Set (204) which has been used as a load tender. The EDI 990 message will be sent from the Carrier to One Network and will be used to accept or reject the tender for the load (movement).
